Modern complex consists of 5 jumping hills

The system of artificial snow supply allows starting winter season in November.

The jumping hills are equipped with summer plastic covering and evening light.

Hill sizes	
large hill	K125m
normal hill	K95m
medium hill	K65m
small hills	K40m K20m

There are freezing porcelain tracks, elevators on the jumping hills and two chair lifts on the complex.

The jumping hills are equipped with tenso-platforms which allow controlling the taking-off every ski-jumper from the edge of take-off.

Race-course and biathlon course

Race-courses

3,3 km (height difference 35 m)
2,5 km (height difference 36 m)
1,4 km (height difference 22 m)
1,25 km (height difference 25 m)

9 m wide courses are equipped with evening lights and summer plastic surface. There are biathlon shooting-range, a shooting gallery. There are more than 20 wax cabins and cloak-rooms in modern building which is quite near the stadium.

Comfortable hotel

There is the hotel for 280 persons, with special benefits for athletes near-by the jumping hills. In addition there is the medical-recovery centre in the hotel.
